St. Patrick's Day has special significance in Mexico and among generations of families who can trace their history to the old Southwest, particularly among those of Mexican heritage. This reverence is due to the actions of unsung heroes known as the San Patricios.

While their bravery and military skills are not particularly well-chronicled outside of Mexico and the Southwest, their hero status among Mexicans almost makes up for the absence of their role in the Mexican American War (1846-1848). They remain fondly remembered and admired as Los Colorados -- the redheaded Irishmen who fought in support of the Mexican forces.
